EXPERIENCE

Aquatics Lifeguard and Swim Instructor

June 2024 – Present

Malton Community Center

Mississauga, Ontario

- Taught over 30 different classes with children from different age groups
- Developed unique and effective strategies to foster a positive and productive learning environment for over 100 kids
- Designed engaging lesson plans to teach students effectively while catering to the different methods of learning for students

Church Altar Server

April. 2018 – Present

Our Lady of the Airways Church

Mississauga, Ontario

- Acted as a mentor to over 30 younger altar servers and trained them to perform the duties of an altar server
- Maintained the church and related facilities for over 100 hours to maintain a positive, healthy environment to parishioners during the mass
- Volunteered at over 10 different altar server meetings to help facilitate training for over 35 altar servers

Data Fest Hackathon Participant

April 2026

University of Toronto

Toronto, Ontario

- Analyzed and manipulated real world hospital data with over 1,000,000 entries
- Applied linear regression to a dataset in order to extract meaningful insights about breast cancer rates in women
- Developed and presented a plan based off of data to provide a better and safer hospital experience for over 10,000 patients

PROJECTS

EdTech Learning Platform | Founder (Early Stage)

- Designing an EdTech platform aimed at improving STEM comprehension for high school students in math, physics, biology, and chemistry
- Spent over 50 hours studying various teaching and learning methods to help myself and students learn more effectively
- Learning JavaScript, React, SQL, and Node.js to independently build the platform's MVP

Arcane Spell Casting | React, Typescript, HTML, CSS, MediaPipe, TensorFlow.js, Pixi.js

- Developed a program that triggers custom VFX based on real-time hand positioning using the MediaPipe handtracker
- Trained a neural network using tensorflow.js on over 900 different samples and achieved an 80
- Mapped recognized gestures based on math or the neural network calculation to a library of custom particle and lighting effects triggered dynamically in the browser

EDUCATION

Ascension of Our Lord Secondary School

Mississauga, Ontario

Graduated with a 4.0 GPA

Sept. 2021 – June 2025

University of Toronto - St. George Campus

Toronto, Ontario

Bachelor of Arts in Data Science, Minor in Computer Science

Sept. 2025 – Current

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, R, HTML5, CSS
